1. Limited Product Warranty

Linuo Power warrants that its modules will be free from defects in design, materials, workmanship and manufacture under normal conditions of use, installation and maintenance. If, within the first ten years commencing on the Warranty Start Date, damages or defects occur in the course of normal application, installation and use which can be traced back to faults of materials and/or workmanship, confirmed by Linuo Power, Linuo Power will, at its sole discretion, repair or replace the module(s), or refund the purchase cost according to the current list price of Linuo Power Modules.

The repair or replacement or refund remedy shall be the sole and exclusive remedy provided under the "Limited Product Warranty" and shall not extend beyond the period set forth herein.

Any color change on module, any deterioration in appearance of the module (including any scratches, stains, mechanical wear, rust, or mold), or any other changes to the module which occur after delivery to the Buyer, do not constitute a defect under this warranty unless it materially impairs the module's functioning.

Linuo Power guarantees that the glass of a module will maintain its integrity provided there are no indications of localized impacts or external forces. A claim in the event of glass breakage arises only to the extent that there was no external cause of the breakage.

2. Limited Power Warranty

Linuo Power warrants that for a period of twenty-five years commencing on the Warranty Start Date loss of power output of the nominal power output specified in the relevant Product Data Sheet and measured at Standard Test Conditions (STC)(i.e., light spectrum of AM 1.5, irradiance of 1000 W/m² and cell temperature of 25°C) for the module(s) shall not exceed

For Mono-crystalline Modules: 3.5 % in the first year, thereafter 0.68% per year, ending with 80% in the 25th year after the Warranty Start Date;

For Poly-crystalline Modules: 2.5 % in the first year, thereafter 0.729% per year, ending with 80% in the 25th year after the Warranty Start Date.

The actual power output of the module shall only be determined for verification using Standard Testing Conditions (STC) in accordance with IEC 60904. The actual power output measurement is

either carried out by a Linuo Power facility calibrated with standard module from TUV or by a Linuo Power recognized 3rd party testing institute. Testing equipment tolerances will be applied to all actual power output measurements.

In the event it is determined that there is a negative deviation of actual performance from the warranted values, which is attributable to defects in material and /or workmanship confirmed by Linuo Power, and then Linuo Power, at its sole discretion, will compensate for such loss in power by either providing to the Buyer additional modules to make up the total wattage loss, or by repairing or replacing the modules or providing to the Buyer financial compensation for the reduced performance of the modules.
